

The Dilemma of Aviation Electronics (iPad and ForeFlight)

At this event you will learn basic techniques for using and interpreting the information presented by ForeFlight on an iPad. Learn what it can and cannot do. What you don't know about your aviation tools can be fatal. Learn the strengths and drawbacks of one of the most popular aviation tools, ForeFlight application on the iPad. Topics include: Settings - how to personalize your app, Downloads including documents, Self-briefing (weather, NOTAMS, TFRs), Flight Planning for VFR and IFR flights, Weather imagery, Approach plates, and Airport View (all tabs). Yes, questions are welcome; we're counting on lots of them. Click on the link below and register TODAY.

Directions: Event is in the Wings of Carolina Flying Club facility.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
